Discover & Create with AI

“Discover & Create with AI” is a fun and engaging activity where students become AI explorers! One team member dives into the world of AI tools, discovering 50 amazing tools and their uses, while the other brings creativity to life by using a selection of these tools to make something exciting—like digital art, memes, videos, or infographics. This activity combines research, teamwork, and creativity, giving students a hands-on experience of how AI can be explored and applied in real life.

Objective:

- To learn about 50 different AI tools and their purposes.
- To apply AI tools in a creative way to make an original output.
- To develop teamwork, collaboration, and problem-solving skills.

Team Requirements:

- Teams must consist of **2 students**.
- **Member 1 – Researcher:** Responsible for exploring AI tools.
- **Member 2 – Creator:** Responsible for using the tools creatively.

Step 1 – Researcher (Member 1):

1. Research and create a list of 50 AI tools.
2. For each tool, write one line describing what it does.
3. Tools can belong to any category, such as:
 - Image / Video / Text / Coding / Machine Learning / Education / Productivity / Design / Audio / Presentation
4. **Deliverable:** A numbered list of 50 AI tools with a short description for each.

Step 2 – Creator (Member 2):

1. From the list created by Member 1, select 10 AI tools.
2. Use these tools to create one creative output, which can be:
 - Digital artwork / Meme pack / Infographic / Poster
 - Short video / AI-generated story / Comic strip
 - Presentation slides / Dataset visual design / Tool comparison chart
3. **Deliverable:**
 - The creative output file (image/video/document).
 - A short paragraph explaining: “How I used the AI tools to create this.”
